

紙盒尺寸範圍
Carton Size Range

	Min.mm	Max.mm
A	60	220
B	15	70
C	20	100

☆ B+C ≤ 150

機 型 Model	JC-CTM
生產速度 Speed(bpm)	30-60
使用電源 Power Source(VAC)	220V/380V 50HZ/60HZ single phase/3 phase
電機功率 Power Consumption(kw)	1.5
耗氣量 Air Consumption(min)	4-6 Kgs x 30 Liter
機器重量 Machine Weight(kg)	550

水平式自動裝盒機 Automatic Horizontal Cartoning Machine

Jih-Cheng 紀正機械
Jih Cheng Machinery Tech. Co., Ltd

適用於各類紙盒包裝作業。
This machine is suitable for various cartons packing operations.

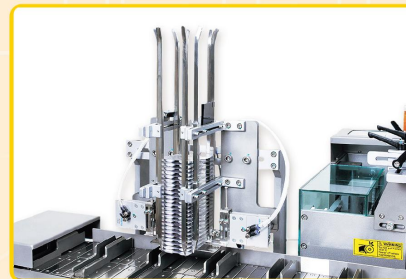

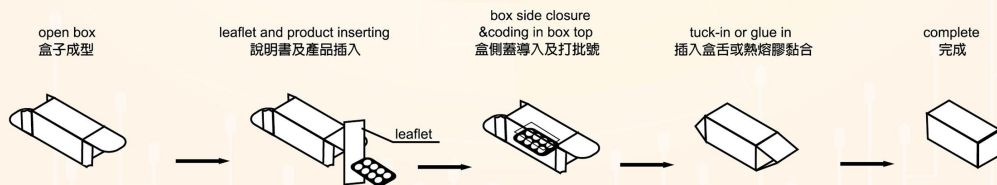

Models : JC-CTM series

自動裝盒機

本機採用水平式間歇設計，盒子打開之後產品以推入方式入盒，可避免內容物受損且入盒順暢，即使內容物是軟質如藥片或隱形眼鏡，皆能平滑的入盒，另可加裝熱熔膠機適用黏合式紙盒。從盒子成型、包裝物裝入、說明書的插入及印製批號、生產日期皆一貫作業，並裝有各種故障顯示，安全性高；紙盒包裝美觀，亦節省大量人力，適用於製藥、化妝品、五金、鉛塑包裝、軟膏、隱形眼鏡、高爾夫球、食品、文具等包裝。

Automatic Catoning Machine

The machine adopt horizontal intermittent motion design, contents insert smoothly and easy, even the ALU ALU or strip pack. Also can choice with Hot-Glue Melting Device for seal end box. Completes products insertion, leaflet insertion and production batch & expiry data coding in one run. Also equipped with malfunction warnings for fail packaging processes. It is labor saving and suitable for pharmaceutical, cosmetics, hardware, PTP, ointment, contact lenses, golf ball, food, stationary, etc..

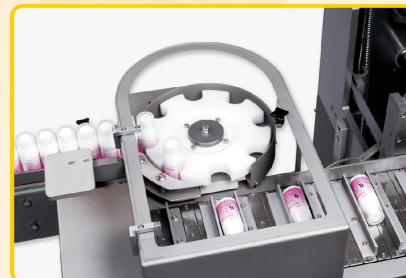

藥片放置架

利用汽缸放置藥片至輸送帶上面，可調整使用不同尺寸之藥片，亦可調整汽缸位置，達到多片裝盒。

Blister pack magazine

The Blister pack magazine is equipped for blister pack feeding and control by cylinder. Also can feed multi-pcs when adjust cylinder position.

瓶用進料星盤

利用星盤做分瓶動作，準確地將包裝物放置在輸送帶上，更換不同規格時只需要更換星盤。

Bottle starwheel

A starwheel is equipped for bottle separating from each other and for precise loading on conveyer. It is only to replace a new starwheel for different bottle sizes.

軟管輸送帶

專門用於銜接軟膏充填機，以達到自動化生產線之目的。利用汽缸將軟膏分開，確保每條軟膏能確實地放置在輸送帶上面。

Tube conveyor

Specical design for connecting with ointment filling machine, and achieve complete automatic production line purpose. Ointment is separated by cylinder and to ensure that all ointment is placed on conveyor properly.

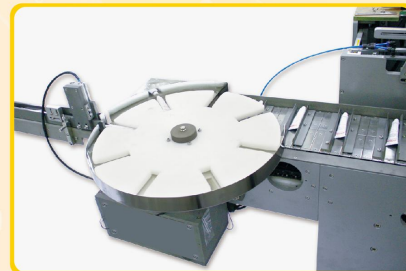

皮帶輸送帶星盤

利用皮帶式輸送帶加星盤裝置，可以適用產品如管狀、托盒或玻璃袋包裝等產品，達到自動供料功能。

Belt conveyor with starwheel

Use belt conveyor with starwheel device, can reach auto-feeding for ointment, plate tray or poly bag contents, etc..

散劑供料架

利用真空吸引，將軟包裝產品自動供料在輸送帶上，可設計不同組數之下料裝置，達成多片軟包裝裝盒。

Sachet Magazine

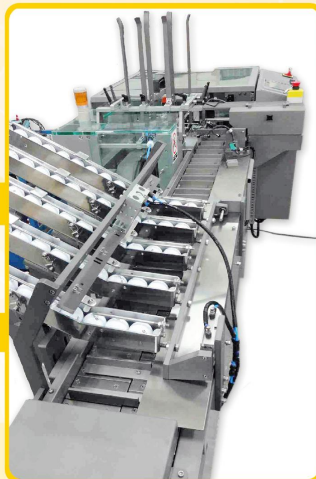

Feeding device use multi packing magazine and suck device for soft pack as sachet.

高爾夫球供料架

配合高爾夫球供料機使用，入料裝置亦可同時供給不同球號，達到自動裝盒的目的。

Golf Ball Feeder

Connect with golf ball feeding tank, can feed different number of ball at same time and finish auto carton prupose.

手放入料

無法自動供料之產品亦可配合人工供料達到自動化裝盒要求。

Manual Feeding

Manual feeding device for special contents.

印字輪

在裝盒過程中，利用鋼字輪打印上生產日期、有效日期與生產批號，鋼字採用高級合金鋼硬度處理，不易磨損，可長期使用。

Coding type wheel

To code manufacturing date, expiry date and batch numbers. A durable steel type is adopted to emboss such information on carton.

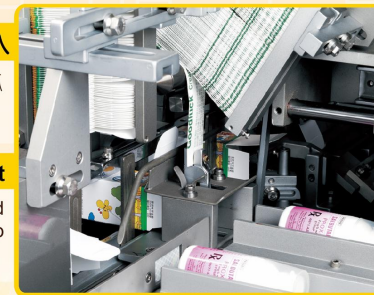

說明書插入

利用真空吸盤及夾爪運作，能準確的將說明書放入盒中，夾爪沒夾到說明書時，機器會自動停機，避免造成不良品的流出。

Leaflet Insert

By using a vacuum cup and a gripper, the leaflet is pushed precisely into the carton. The machine stops when there is no get, so as to avoid product missing with leaflet.

條碼讀取裝置

利用條碼讀取裝置或影像感應器，針對製藥條碼(pharma code)、二維條碼(QR code)或其他比對條件，對包裝物內容與包裝內容做確效。

Bar code reader

Use bar code reader or CCD to detect pharma code, bar code, QR code for product validation purpose.

剔除裝置

配合驗證裝置對於不符合條件之產品包裝，利用機器出口尾端桿端裝置將產品做剔除動作。

Rejection

Work with detection system for rejection purpose.
