適用於各類瓶蓋封蓋作業。

Automatic cap sealing machine is suitable for different containers and caps.

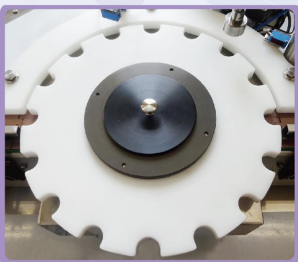

Model : JC-C series

自動封瓶蓋機

本機是針對各種方式的容器之封蓋作業所設計：美觀、不易損傷瓶蓋，完全符合cGMP之標準。操作簡單，可在短時間內變更不同容器封蓋作業，達到一機數用的成本效益。適用於一般化工、製藥、食品、化妝品以及清潔用品等的自動封蓋作業使用。

Automatic cap sealing machine

The machine is designed for containers of various forms. Being good looking, not damaging bottle and meeting cGMP requirement, it is easy in operation, short change-over time for different container and caps, thus very economical for one-machine-multiple application operation. These automatic capping operations include applications in chemical, pharmaceutical, food, cosmetic and detergent industries.

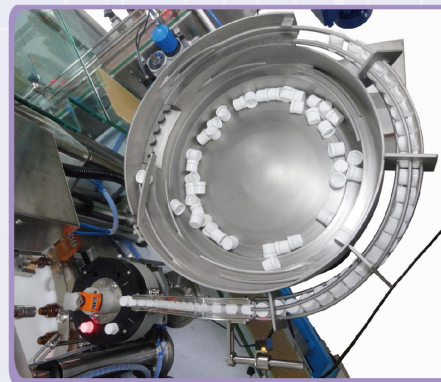

星盤扭力過載

星盤附有扭力過載跳脫停機安全裝置。

Starwheel over load

For safety, machine stops immediately when starwheel over load.

震動下蓋

利用週期性震動原理將瓶蓋規則送出，達到自動化要求。另依不同瓶蓋設計和速度要求規劃不同供蓋設備。

Cap vibrator

By using vibration device to feeding cap smoothly. Also can design difference auto feeding device for special cap design and speed requirement.

鋁蓋攻牙系列 "C" Series

封蓋頭設計為不鏽鋼滾刀，並可自由調整封蓋緊實度，瓶蓋美觀不易受損，可依瓶蓋尺寸不同，輕易的進行更換封蓋頭，滿足客戶不同需求。

Roll-on cap sealing

The sealing head designed with the sealing rollers which is convenient to adjust the capping tightness for remaining the caps in a good condition. Additionally, the sealing head is easy to exchange for different cap sizes.

迴轉式系列 "R" Series

迴轉式的設計，由多組封蓋頭同時進行封蓋，速度快、產能高，能滿足客戶高產量的需求。

Rotary-series

It is a rotary, multi-sealing head design for faster sealing operation to meet customer's high volume requirement.
